## PROFESSIONAL SUMMARY

Computer Science & Business Systems undergraduate and production-grade full-stack engineer with a demonstrated track record of independently designing, building, and shipping web, mobile, and AI-powered applications. Independently founded FeedoZone, a hyperlocal food delivery platform, and engineered three production-ready applications end-to-end using React Native, Next.js, Node.js, and Firebase. Built an AI-powered voice and command assistant capable of autonomous browser control, and a real-time vehicle detection system using computer vision. Proficient in JavaScript, TypeScript, Python, C, OOP, Data Structures & Algorithms, REST API design, and Firestore data modelling. Seeking a Software Engineering or Full Stack Development internship to apply deep product-execution and engineering skills to scalable systems.

## EDUCATION

|                                                                                            |             |
|--------------------------------------------------------------------------------------------|-------------|
| <b>Tatyasaheb Kore Institute of Engineering &amp; Technology (TKIET), Warananagar</b>      | 2024 – 2028 |
| B.Tech — Computer Science & Business Systems (CSBS)   CGPA: 6.50/10 (2 <sup>nd</sup> year) |             |
| Higher Secondary Certificate (HSC), Science — Maharashtra State Board                      | 2023   53%  |
| Secondary School Certificate (SSC) — Maharashtra State Board                               | 2021   84%  |

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, SQL, C, C#

**Frontend:** React, Next.js, React Native, HTML5, CSS3, Tailwind CSS

**Backend & Databases:** Node.js, REST APIs, Firebase, Firestore, Firebase Authentication

**AI & Computer Vision:** Python (OpenCV, YOLO), Voice Command Processing, Browser Automation, NLP

**CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks, Software Engineering

**Cloud & Tools:** Vercel, Git, GitHub, VS Code, Figma

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                    |

| <i>Tech Stack: IoT Sensors, Firebase, JavaScript</i> <ul style="list-style-type: none"><li>Built an IoT water monitoring system integrating real-time sensor data (flow, tank level, consumption) with a Firebase dashboard and automated alerts, replacing manual checks and enabling early leak detection.</li></ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                    |

## LEADERSHIP & ACHIEVEMENTS

- Tech Head, CSBS Association — Led coding workshops, technical events, and inter-departmental hackathons; coordinated student activities with faculty.
- Graphic Design Head, IEDC Committee — Directed branding and visual identity for entrepreneurship events; produced social media creatives and event materials.
- 3rd Prize — IIT Patna IICHE Chemathon 2026 | 3rd Prize — National Paper Presentation & Project Exhibition | 2nd Prize — MBA Fusion Fest 2K25
